DETAILED ACTION***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/29/2007 has been entered.

Claims 9-11, 13-30, 32-40 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and others of copending Application No. 10427666. Although the conflicting claims are not identical, they are not patentably distinct from each other because this is essentially the same process for making the compounds of 10427666, with just minor changes.

Applicants most recent arguments were made in the paper of 01/29/2007.

The traversal misunderstands the rejection. It is correct that if a restriction is made between A and B, that the examiner cannot make an Obviousness-type double patenting rejection of Claims to B (in a continuing case) over A (in the earlier case) without TC Director approval. But that is not what the examiner is doing. The examiner is rejecting Claims to B (in a continuing case) over B (in the earlier case). Therefore, there is no inconsistency between the ODP rejection made here and the restriction made in '666 (or in this case).

The other argument, as best the examiner understands it, turns on the fact that the claims in '666 over which the ODP rejection is made are non-elected in the parent. This is correct. However, applicants present no support for the notion that this bars the examiner

Art Unit: 1624

from making the rejection. The MPEP gives no indication that an exception is made in cases where the claims in the earlier case are non-elected.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, THIS ACTION IS MADE FINAL even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
